

The AME Group is a Western Canadian based Mechanical Engineering (Buildings Engineering) consulting company that specializes in sustainable and environmentally responsible design. Projects are primary located across Canada and range from the design of small residential complexes to large hospital and institutional facilities. range from the design of small residential complexes to large hospital and institutional facilities. Our company is a rapidly growing organization that provides competitive salaries and benefits while allowing excellent career opportunities and a great learning and mentoring environment. Our offices are located in Victoria, Vancouver, and Calgary, offering central locations as well as flexible work hours.

We are currently seeking to fill a Project Manager position in our Vancouver office. Applicants should be motivated, talented, and committed team members. Creative thinking, a proactive attitude, good communication, organizational, and report writing skills are essential.

We are currently seeking a well-experienced engineer with an excellent track record – technically, and in project delivery and implementation. You will have considerable experience in HVAC, plumbing systems and fire protection in such diverse projects.

Responsibilities and Expectations

- Maintains an up-to-date knowledge of technological developments in the field of engineering.
- Conducting client meetings, preparing correspondence, reports, specifications and meeting minutes.
- Maintain effective liaison with clients, developers, consultants, agencies and the public either in concert with the principal-in-charge or independently on behalf of the practice
- Directing staff on projects, assigning and reviewing work, and advising on technical problems.
- Establish and maintain project criteria by means of team-based communication
- Establish and monitor internal budgets and project delivery schedules
- Motivate teams toward performance excellence in all assigned tasks

Qualifications and Experience

- P.Eng. designation preferred however not mandatory.
- Minimum of 7 years of mechanical HVAC, plumbing and fire protection experience in design, project management and client relations
- Analytical, communication and report writing skills including the ability to obtain information and prepare reports.
- Strong interpersonal skills with the ability to establish effective working relationships with all employees, client divisions/sections, outside agencies and/or politicians and other levels of government.
- Demonstrated ability to manage multiple assignments and conflicting priorities
- Ability to formulate sound engineering decisions and judgment

- Interest/experience in the application of green engineering principles; LEED® certification preferred

We offer:

- Competitive pay
- Every second Friday off
- Comprehensive health benefits
- Profit sharing
- Potential future partnership and/or ownership
